

JARRAH HATCHETT

Film and Freelance

I am excited to finish my Bachelor and gain employment in the industry helping to tell stories and explore the world the way I see it through my unique lens. My goal is to create a series that will showcase the meaning behind artists, and their important unique creative processes that shape their lyrics and stage presence. Diving into inspirations, past, present and future goals along with their achievements. Creativity is the most important thing in the world and having employment from it is a very special thing.
